Deliverable 4

Github repo: https://github.com/albertoopadilla/Deliverable4.git

Github web link: https://albertoopadilla.github.io/Deliverable4/main_page/main.html

For my deliverable 4 I made some changes on the html and css from the previous deliverable to improve some aspects of the web page, and to include desktop and tablet view. As well, I added javascript to give some animations. These are the following things I added:

- JavaScript: I added 5 JavaScript functions to give a higher user experience of the page. The first one is using lightbox, so when the user clicks on the image, he can see the whole image. Secondly, I used java to detect if there was a missing photo, and if there was, change it with the default image. Third, I implemented a button for the different columns to sort the tables depending on the preferred data. Fourth, I added a navigational bar to filter the desired meet for the runner. Finally, I highlighted the row for the meet where the runner was faster

- Views: For the 2 views I added, there was one with min 700 width, and another with 1000 min pixels. For the first one (Tablet view), I made that the links inside the summary bar were distributed in two columns. For the view with the 1000 width (Desktop), I made that the buttons were displayed using inline block

- Finally, I fixed some things and implemented new things, such as adding text overflow ellipsis to add ellipsis if the words in the summary bar didn't fit. Another thing was making the summary bar vertical, instead of horizontal.

About Us
Welcome to the official Home Page, where dedication, skill, and passion come together to inform of athletic talent. Our team is composed of exceptional programmers who strive for excellence both on and off the field. Guided by integrity and sportsmanship, we aim to inspire and lead by example. Whether it's raining, snowing or any bad weather, we are committed to show all the details of the greatness of different athletes and make a positive impact. Thank you for supporting us on our journey!
